About Me

AI Engineer with 3+ years of experience in building AI-powered applications and multi-agent systems. Expert in Python-based machine learning with hands-on experience in PyTorch and TensorFlow for model development, and ONNX-Runtime for high-performance inference. Proven ability to deploy scalable, production-ready AI solutions on AWS using CI/CD pipelines.

Work Experience

Greet Labs Pvt Ltd

AI ENGINEER

Jan. 2024 - Present

- Architected cutting-edge AI solutions for BFSI clients as part of the Financial Services Market Unit (US), specializing in financial document processing and regulatory-compliant automation solutions.
- Delivered successful POCs for content standardization using parallel LLM processing, achieving 97% reduction in processing time, reducing compliance violations.
- Architected and deployed an enterprise-grade RAG-based document processing system for automated form filling and response generation from multiple document formats and languages.
- Engineered high-performance RAG architectures including Form Filling Assistant, achieving 80% faster document processing across workflows.

Greet Labs Pvt Ltd

ASSOCIATE SOFTWARE DEVELOPER

Jan. 2021 - Feb. 2024

- Spearheaded the design and deployment of an LLM-driven testing automation platform for log analysis, bug tracking, and reporting, slashing manual effort by 80%.
- Scaled infrastructure for 25,000+ enterprise customers through AI-enabled cloud migration and performance optimization initiatives.
- Demonstrated the solution to SAP clients, highlighting measurable improvements in cloud adoption and enterprise AI integration.

Projects

MULTI-AGENT GENERATOR

- Built a Python-based GenAI framework that converts natural language instructions into fully configured multi-agent AI systems.
- Used LLMs, prompt engineering, and modular agent design for scalable AI workflows.
- Reduced manual AI workflow setup time by automating agent configuration using LLM-driven logic.

ONLINE BANKING

- Uses Python and MySQL - Transaction Management, Loans, Cheque, Fund Transfers.
- All forms validated on Client Side using JS and on Server Side using Python.

Skills

LANGUAGES & FRAMEWORKS

Python, Pandas, HTML, CSS, React.Js, NumPy, OpenCV.

AI / ML

PyTorch, TensorFlow, Scikit-learn, ONNX Runtime.

LLM / GEN AI

LLMs, Prompt Engineering, CrewAI, LangGraph, Agno.

APIs

API Development, Microservices

DATABASE

MySQL

DEVOPS

Jenkins, Docker, Git, CI/CD, AWS Cloud Deployment.

Education

AMC Engineering College

MASTER OF COMPUTER APPLICATIONS

Bangalore

- Class : First Class

DAV PUB School TTPS Lalpania

HIGH SCHOOL

Bokaro
